INTRODUCTION

I'm currently a 4rd-year student, so I want to achieve more experiments with realistic websites and applications as a software developer. Looking for a stable position in your company in the future to enhance my knowledge about new and emerging trends in the IT sector.

EXPERIMENTS

WEBSITE MUSIC PLAYER BASED ON SPOTIFY
Developed a web application using PHP and SQL database following the MVC architecture pattern with team. The application utilized Bootstrap, jQuery, and basic SEO principles to enhance its functionality and user experience.
Making the front-end and read the database in the SQL and playsong function. Login and logout function.
